Reasons for Allowance

The independent claims recite sending broadcast messages between recipients and a limitation for the following:

"a message router, configured to parse recipient addresses received in the broadcast message from the sending device over the data network if the sending device is addressable over the data network and over the telephone network"

The prior art of record teaches message routers receiving broadcast messages from senders over data networks and telephone networks. The prior art of record is different because recipient addresses are not parsed in the router as recited in the limitation. New search updates revealed no other prior art which teaches the parsing as recited in the limitation and in the context of the claims. Therefore, claims 42-57, 60-63 and 65-68 are indicated allowable.
